

Microneedling

Dermapen4

Duration: 60 Minutes **R1750.00**
(Face & Neck)
Package of 4 Treatments **R6400.00**

Dermapen 4 is an advanced skin needling treatment that uses ultrafine needles with automated vibration to gently penetrate the skin, stimulating natural collagen production and promoting scarless healing. This treatment creates fine micro-channels in the skin, enhancing the absorption of active ingredients to effectively address signs of ageing - such as sagging skin, fine lines, wrinkles, and pigmentation. It also improves skin tone and texture and reduces enlarged pores. An added benefit is it helps to soften 'barcode' lines above the top lip and reduces creases in the décolletage area. In addition to overall skin rejuvenation, Dermapen4 is highly effective in reducing the appearance of stretch marks, acne scars, and trauma-related scarring (only after the skin has fully healed).

Dermapen4 + Uber Pro Peel

Treatment: 75 Minutes **R2600.00**
(Face & Neck)
Add Treatment : 30 Minutes **R600.00**
(Chest)

Designed to enhance the micro-needling treatment, this advanced Uber Pro Peel contains a specific blend of treatment actives to accelerate cellular turnover, resurface the skin and brighten the complexion. It is particularly beneficial for those with advanced sun-damage or for those looking to intensify their micro-needling results

LED Light Therapy

Dermalux Flex MD

Duration: 30 Minutes **R500.00**
Add-On to other Treatments: **R200.00**

DermaLux Flex MD is a non-invasive, LED-based treatment that uses clinically proven light wavelengths to help address multiple skin conditions. Benefits include anti-ageing, acne, rosacea and helping to reduce general inflammation. It is also used to accelerate wound healing.

Advanced Pigmentation Peel

Mesoesthetic Cosemlan Peel

Duration: 60 Minutes **R16 970.00**

Cosmelan 1 & 2 is a leading depigmentation treatment that targets moderate to severe hyperpigmentation. It works by significantly reducing melanin production, improving visible signs of ageing and helping to prevent the re-occurrence of pigmentation.

This advanced treatment follows a two-phase approach:

Cosmelan 1 (In-Clinic Treatment):

Your aesthetician will apply a specialised depigmenting mask in-clinic. After 6–8 hours at home, you will gently remove the mask. This process induces deep exfoliation and clients can expect visible peeling, redness and mild swelling for about 5–7 days as the skin begins to renew.

Cosmelan 2 (Home Care Phase):

Your aesthetician will guide you with the steps you need to take after you remove the mask and explain the home care product regimen. This crucial second phase enhances and maintains the results of your in-clinic treatment.

Your Cosmelan 2 post-care pack includes:

- Mesoesthetic Cosmelan Facial Cream
- Mesoesthetic Melan Recovery (Barrier Repair Cream)
- Mesoesthetic Mesoprotech Melan 130+ Pigment Control SPF

These carefully formulated products support continued depigmentation, regulate melanin production at a cellular level and help prevent the reappearance of dark spots.

Important: This is an advanced treatment that needs to be done by an experienced aesthetician. This powerful treatment noticeably reduces pigmentation and it also has long-term regulating benefits that help to control the reappearance of pigmentation. Clients need to be meticulously compliant about sun protection to preserve their investment in this treatment.

Visia Skin Analysis

Duration: 20 Minutes. **R 400.00**

The future of skin health is here with the VISIA Complexion Analysis System - cutting-edge technology developed using NASA-inspired advancements. This system captures high-resolution images of your skin using multi-spectral imaging and evaluates eight key areas that impact your skin's health and appearance.

Unlike surface-level assessments, VISIA delves beneath the surface to uncover underlying concerns. The results serve as a personalized blueprint, allowing your Dermatologist and Skin Therapist to tailor your treatment and skincare plan with precision and confidence.

Professional Peel Treatments

SkinCeuticals GL Peel

Duration: 45 Minutes **R 900.00**

A gentle, hydrating, revitalizing gel peel that contains 20% Glycolic acid and 10% Lactic acid. It visibly improves the appearance of the skin leaving it smoother and more radiant.

SkinCeuticals GL Peel + Dermaplaning

Duration: 60 Minutes **R 980.00**

A popular combination treatment that begins with Dermaplaning - a safe and painless method of exfoliation using a precision blade that removes surface debris and peach fuzz. This is followed by a customized chemical peel for enhanced product penetration. The result: deeply refreshed, glowing skin with minimal downtime.

SkinCeuticals Pigment Balancing Peel

Duration: 45 Minutes **R 980.00**

Formulated with Vitamin C, Glycolic Acid, and Citric Acid, this high-performance peel targets sun damage, uneven skin tone, and diffuses localized hyperpigmentation. It also boosts cellular renewal, revealing a more luminous and even complexion

Mesoestetic Peels

Duration: 60 Minutes

Standard Mesoestetic Peel **R900.00**

Add-on Dermaplaning **R80.00**

Melanoplus TCA Peel **R1600.00**

These peels are advanced skin treatments designed to rejuvenate and resurface the skin through controlled exfoliation. Their versatility enables them to treat a variety of skin condition and are safe and effective for all skin types. They offer a wide range of benefits with minimal downtime.

NeoStrata Retinol Pro Peel

Duration: 60 Minutes **R1200.00**

This medium depth peel contains 3% Retinol which is a Vitamin A derivative. The peel is applied in-clinic and has high comfort levels. The client returns home and removes the peel after 8 hours. The skin will peel for 5-7 days post treatment. This peel is suitable for clients who would like a boost and to target any ageing concerns.

pHformula TCA Peel & Product Pack

An advanced, medically supervised treatment with a structured two peel protocol spaced 4-6 weeks apart. It is designed to deliver maximum skin transformation and return on your investment. This is a very popular treatment for those with skin ageing and pigmentation.

Duration per peel: 45 Minutes

First TCA Peel + Post-Treatment Support Pack

R4420.00

Second TCA Peel (4-6 weeks later)

R1600.00

Total Package (Both Peels + Home Kit)

R6020.00

Please Note: The post-treatment support pack below is essential and includes 4 full-size pHformula products. We cannot offer this treatment without this pack as they aid in skin recovery after the peels and they also enhance the results.

Support Pack:

Exfo Cleanse / AGE Active Recovery / Post-Resurfacing Cream / CC Cream SPF 30+

Facial Treatments

Kayleigh's Signature Facial

Duration: 40 Minutes **R800.00**

An express treatment that is designed to leave your skin fresh, luminous, and radiant. Perfect before a special occasion or when your skin needs a little TLC. This facial includes targeted cleansing, exfoliating, toning, replenishing mask and a hydrating serum or moisturiser tailored to your skin's needs.

Medical Deep Cleanse with Exfoliation & Extraction

Duration: 30 Minutes **R670.00**

A targeted deep cleanse for congested, acne-prone skin. Includes extractions using a sterile lancet if needed, followed by a soothing antibacterial serum to calm the skin.

Medical Deep Cleanse with Theraclear Acne System

Duration: 45 Minutes **R895.00**

When further treatment is needed in acne-prone skins, we use the Theraclear Acne Clearing System. This is a breakthrough acne treatment that combines a vacuum with pulses of specifically-filtered light to help clear your pores and treat the acne outbreaks. This treatment is a non-invasive approach with little downtime post treatment.

Medical Deep Cleanse with Theraclear Acne System + Peel

Duration: 60 Minutes **R995.00**

For more stubborn cases of acne, we offer 3 targeted treatments in one session - a medical deep cleanse, a targeted acne peel and Theraclear Acne Clearing System.

Dermaplaning without Peel

Duration: 45 Minutes **R750.00**

Dermaplaning is a gentle exfoliation technique that removes dead skin cells and fine facial hair using a precision dermaplaning blade. This is only temporary facial hair removal but it leaves the skin visibly softer, smooth and refreshed.

Laser

Clear & Brilliant Laser

Duration: 60 Minutes

R 2800.00

The Clear & Brilliant laser is a non-ablative fractional laser known for its gentle yet effective approach to skin rejuvenation. Often referred to as a “Baby Fraxel,” it offers a safe, non-invasive solution for those looking to improve sagging skin, texture and tone but with minimal downtime.

This treatment is ideal for:

- Early signs of ageing
- Maintaining youthful skin
- Maintaining results from previous more invasive skin treatments

Using advanced laser technology, Clear & Brilliant helps stimulate natural collagen production and improve overall skin health - all while keeping your daily routine uninterrupted.

Treatment Process:

Prior to treatment, a topical numbing cream is applied for 30 minutes to ensure your comfort. The procedure itself takes about an hour.

Depending on your skin goals, your aesthetician will choose between two specialised handpieces:

Permea (1927nm) – Perfect for a quick radiance boost before a special event. It enhances tone, refines texture, and imparts a healthy glow.

Original (1440nm) – Penetrates deeper to stimulate collagen production, making it ideal for improving sun damaged skin with deeper wrinkles.

What to Expect:

- Some redness may occur immediately after your treatment, depending on your skin and how it reacts. Your skin will have a light sandpaper-like texture for 5 to 7 days after the treatment.
- Most clients return to work the next day.
- After the skin renewal process, you'll enjoy a visibly brighter, smoother complexion and with multiple treatments you will see an improvement in sagging.

Recommended Course:

For best results, we suggest a series of 3 to 6 treatments, spaced 4 to 6 weeks apart. Your aesthetician will tailor the plan to your specific needs and recommend the appropriate post-care products to support your skin's recovery.
